

VOGUE for IFP - Boards for interactive technologies

Make the most of your square meters by bringing functionality and user-friendliness to all your walls, wherever they are, with the VOGUE board, which provides an XXL magnetic writing and display surface and possibly one or two sliding surface(s).

The version with sliding panels offers a spectacular two-level system with a concealed wall mount and rubber wheels to ensure quiet sliding. Thanks to its flexible design, this dynamic solution allows you to play with colors and perfectly integrate technology such as LCD touchscreens by facilitating cable management.

Details

LARGE DIMENSIONS:The VOGUE surface is up to 2.4 m high and 5 m wide.

DYNAMIC : A rail system offers a second level that can accommodate one or two sliding panels (optional). Anodised aluminium profiles and rails. Rubber wheels for smooth operation. Integrated shock absorber.

MODERN:Without frame, it offers a concealed offset wall fixing system which gives a real impression of lightness.

COLORS : Its smooth 4 mm tempered or laminated glass surface is available in many colors (standard, Vanerum or RAL color collections available with more delay), in order to play with colors and even to create audacious combinations between the fixed and sliding surfaces.

DURABLE : The glass resists to frequent cleaning and disinfection and offers great stability thanks to the galvanized sheet that ensures a long life.

INTEGRATED TECHNOLOGY: The VOGUE is engineered to integrate 75" digital touch screens seamlessly. It facilitates cable management by hiding them and minimizing their size.

WRITING AND DISPLAY:Write all your messages using drywipe markers (white glass) or wet erase chalkmarkers and display your memos with high-power neodymium magnets (in option).

Materials

Surface in glass available in the following qualities and standard colours: tempered lacquered glass -white (RAL 9010), black (RAL 9005) or grey (RAL 7011) / laminated glass - red (RAL 3000) . Other colors (Vanerum and RAL colour collections) on request.

Backing made from galvanized steel (0.4 mm) to allow display with high-power neodymium magnets.

Anodized aluminum profiles and rails.

Nylon rollers for a smooth and silent glide.

Built-in shock absorber stop.

Certifications & warranty

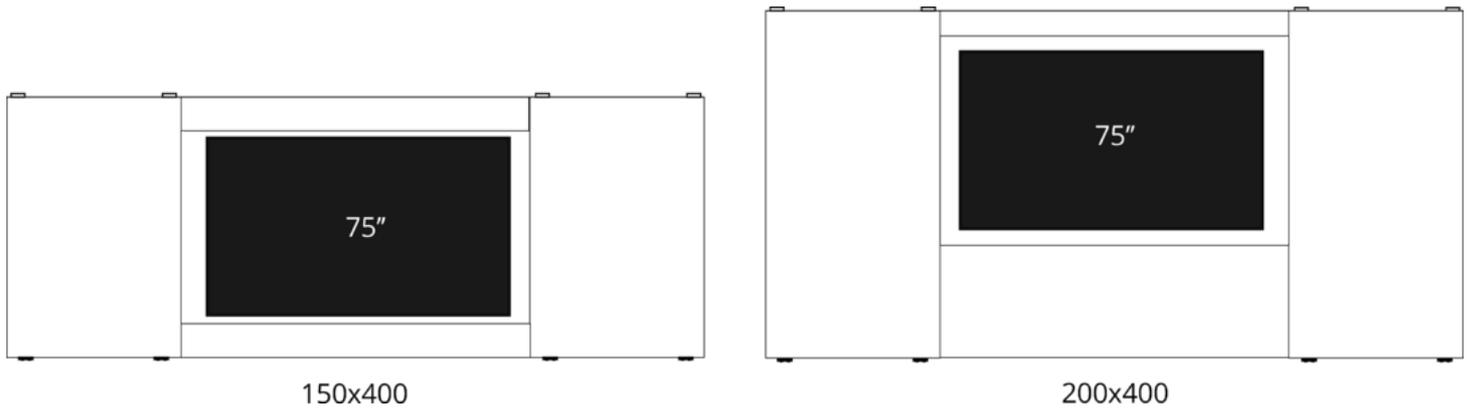

2 years

This product is manufactured in a French factory which is certified to ISO 9001, ISO 45001 and ISO 14001.

M1 fire rating.
