

VIDOC - Partition wall Partition walls and screens

The safety and well-being of the users is a priority. VIDOC clear partition walls create protection without visually isolating users, making it easier for them to continue to collaborate and communicate. Mobile and flexible, the partition walls can be quickly adapted to a new configuration as required and can be assembled together in a U or L shape. The glass is also easy to clean and disinfect on a daily basis.

Benefits

PROTECTION AND COLLABORATION: The transparent VIDOC partition wall ensures the sanitary safety of your employees while allowing collaboration and communication. It allows light to pass through, which is a source of well-being.

FLEXIBILITY: Mobile thanks to its wheels, the partition wall can follow you everywhere and allows you to quickly rearrange spaces according to your needs. Assemble several partitions together to separate spaces.

WRITING AND DISPLAY SURFACE: Ultra smooth, glass provides a pleasant surface for writing with dry-wipe markers or liquid chalk markers and for displaying sticky notes or memos with masking tape. Enamelled steel surface vitrified at 800°C allows dry-wipe writing and display using magnets.

FREQUENT CLEANINGS AND DISINFECTIONS: Smooth and non-porous, glass and enamelled steel have a bacteriostatic surface that is unfavourable to the spread of bacteria and viruses. Easy to maintain with a clean microfiber (+ water and soap), they also resist daily disinfection with chemicals.

DURABILITY AND SAFETY: Rated A+ for indoor air emissions and guaranteeing safety in the event of breakage, the glass keeps a like-new appearance and offers a long service life. Guaranteed for life* and 99% recyclable, e3 enamel surface offers greater resistance to scratches, bacteria and chemicals.

INDUSTRIAL STYLE: The black base and frame combined with the glass bring a factory look.

COLOURS: Add a touch of cheerfulness with the optional translucent coloured glasses.

Specifications

Double surface to be chosen in 5 mm thick transparent laminated glass and/or in e3 marker white enamelled steel vitrified at 800°C. Honeycomb substrate (14 mm) for enamelled panels.

Bonded using polyurethane glue with absolutely no VOCs for enamelled steel panels.

Horizontal aluminium profile.

Black epoxy steel base with 4 lockable wheels or 2 wheels and 1 adjustable cylinder to combine several partition walls.

Certifications & warranty

Standard warranty: Partition wall: 2 years / Surface: for life.

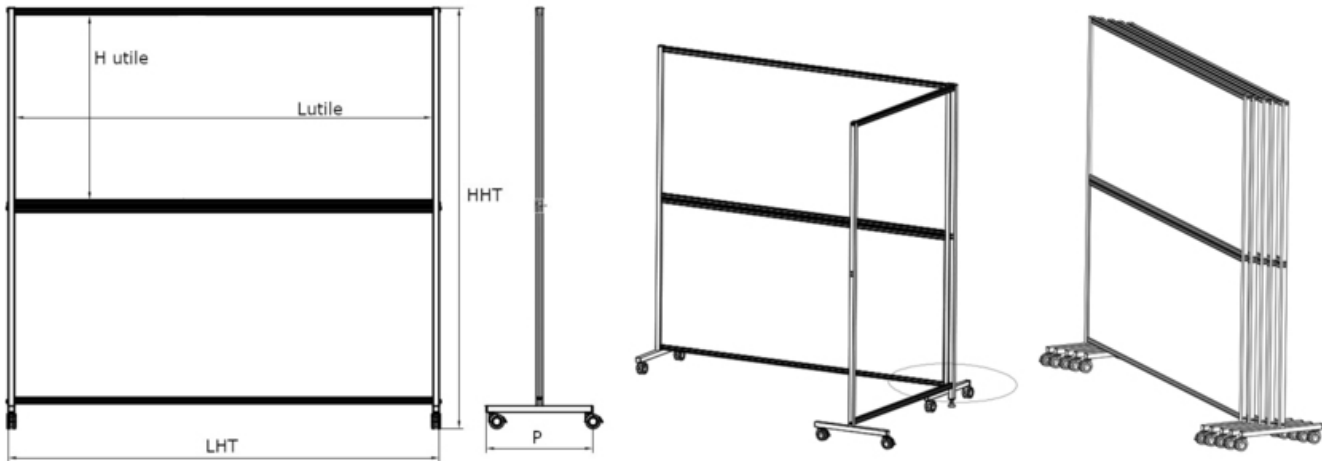

Nid d'abeille, aggloméré et liège certifiés PEFC.

Produit fabriqué dans une usine française certifiée ISO 9001, OHSAS 18001 et ISO 14001.

Classement au feu M2.
